EXPERIENCE

FunctionUp, Backend Developer Trainee

SEP 2022 - PRESENT

- Trained in Backend Development using **NodeJS** with **Express** and **MongoDB**.
- Understand **caching** fundamentals and hands-on with **Redis**.
- Hands-on experience with **AWS S3** file upload and read.
- Participated in FunctionUp coding competitions on **CodeZinger**, **LeetCode** and **CodeWars**.

Teaching Assistant (TA) at FunctionUp

NOV 2022 - PRESENT

- Worked as Teaching Assistant to guide junior batch students solving their doubts and helped them in their projects.

INTERNSHIP

Internship at FunctionUp,

SEP 2022 - PRESENT

- During this internship I learn JavaScript, NodeJS.

Internship at LI-MAT Soft Solution,

MAY 2022 - JUN 2022

- I successfully completed an internship at "Li-Mat Soft Solution Pvt Ltd". I was completed project "Authentication with E-mail verification using Django" on "Python Programming".

PROJECT

E-Commerce and Cart Management | <[GitHub -Link](#)> [Dec-22]

Tech Stack: NodeJS, JavaScript, MongoDB, AWS S3, Bcrypt

This project is based on the E-commerce website and Cart Management. In this project, we had to create 4 Model like user model, products model, cart Model and order model. First, we need to create User. Then add products. After that User can add product in their cart which user wants to buy. And finally, user can order those products from Cart. Real time example of this project is some e-commerce website like Amazon, Flipkart, etc.

URL Shortener | <[GitHub -Link](#)> [Dec-22]

Tech Stack: NodeJS, JavaScript, MongoDB, Redis, Shortid

URL shortening is used to create shorter aliases for long URLs. We call these shortened aliases "short links". Users are redirected to the original URL when they hit these short links. Short links save a lot of space when displayed, printed, messaged, or tweeted. Additionally, users are less likely to mistype shorter URLs.

E-Book Management | <[GitHub -Link](#)> [Nov-22]

Tech Stack: NodeJS, JavaScript, MongoDB, AWS S3

This project is basically for the Book Management. In this project, we had to create 3 Model like user model, book model and review model. First, we need to create user and users can create their book. Then we can give review for those Books.

Internship Website | <[GitHub -Link](#)> [Nov-22]

Tech Stack: NodeJS, JavaScript, MongoDB

This project is basically for the Internship Site. In this project, we had to create 2 Model like College Model and Intern Model. First, we need to create College and user can apply for Internship in their colleges. Real time example of this project is Naukri.com, LinkedIn, Internshala, etc.

SKILLS

- JavaScript
- Python
- OOPs
- NodeJS
- Express
- DBMS (MongoDB)
- RDBMS (MySQL)
- GIT
- AWS S3
- Redis
- Data Structure & Algorithm
- Postman
- HTML
- CSS

EDUCATION

Firoze Gandhi Institute of Professional Studies, Raebareil, Uttar Pradesh

Bachelor in Computer Application [2022]

New Standard Public School, Raebareil, Uttar Pradesh

Higher Secondary Education [2019]

New Standard Public School, Raebareil, Uttar Pradesh

Secondary Education [2017]

SOFT SKILLS

- Time Oriented
- Teamwork
- Respective New Ideas
- Hard Work
- Leadership Quality
- Honesty

ACHIEVEMENTS

- Participated in dancing completion and secure first prize in my school.
- Participated in singing completion and secure first prize in my college.
